

## *A Month with Edge*

### **A Week At Norma's**

The Demolition

A New Septic Tank

A Dog House

Electric Work

New Cement Floor

And a New Roof!

**The Month of June**  
Edgar and I hosted a team of 15 college-age students from Kentucky working with Edge Outreach. The team came prepared for all types of ministry, but more than anything, they came with willing hearts, desiring to be used by God to let others know about Jesus.

In each project, Edgar and I saw hope restored in the hearts of the people.

could purify their water using the system and shared with them that God had called this team to come to Costa Rica to show them His love. As they took turns tasting the pure water, they would get excited and leave to go tell their family and friends about the blessing God has brought to their town.

**Week Three:** Our goal for the week was to put a new roof on Norma's

**Week One:** The team worked on the mission house- painting, building, and organizing, plus visited an orphanage.

**Week Two:** We traveled to Guanacaste to install water systems in two different communities. We met a people without hope for change, knowing the bacteria-filled water they were drinking and cooking with was the reason they saw sickness and even death within their families. We showed them how they

house. As you can see from the pics, the team accomplished far more than we imagined! Norma has told Pastor Benjamin that she would love to start a Bible study in her new home.

**Week Four:** The team finished building the walls of Norma's house and worked on various projects with YWAM.

**It's amazing what God will do with a willing heart.** One thing is for sure... lives are touched.

### **PRAYER REQUESTS**

- ◆ **Edgar - he has started taking English classes!**
- ◆ **HOPE - small groups**
- ◆ **God's protection over us and the mission house**
- ◆ **Financial Support**

### **HOPE** *La Esperanza*

Edgar and I are working in the area of evangelism in our local church. This past month we launched a new project called HOPE. It's a wonderful video curriculum that tells the story of creation all the way to the life of Jesus. It's a personal way of inviting our non-Christian friends into our homes and being able to discuss as we learn about God's purpose from the beginning of time.
